Replace the filters yourself in about 10 minutes

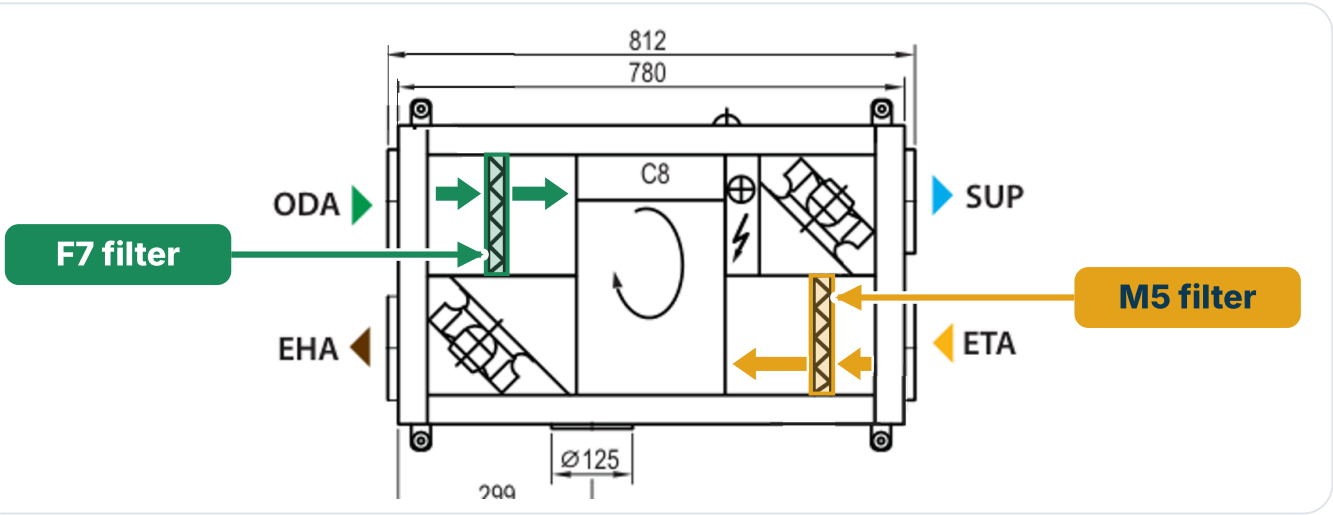

Komfovent Domekt R 150 F C8 • right-hand version (R1)

1 × F7 filter
blows fresh air into the room

1 × M5 filter
draws room air out

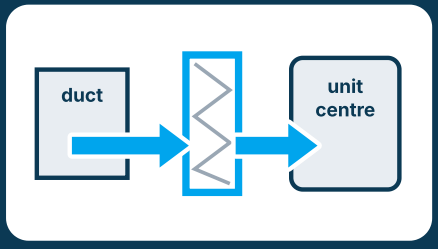

≈ 10 minutes
time needed

1 Where are the filters?

Manufacturer's drawing. The coloured arrows show how the air moves: at the F7 from the left (ODA) to the centre of the unit, at the M5 from the right (ETA) to the centre of the unit.

2 Most important: the arrow on the filter

The air moves from the duct to the centre of the unit.
So the arrow on the filter must point TO THE CENTRE OF THE UNIT

Each filter has an arrow on its frame. The arrow shows which way the air goes through the filter. The F7 arrow points away from the ODA connection, the M5 arrow away from the ETA connection. A filter fitted the wrong way round does not clean the air properly.

3 Right way and wrong way

outside  to centre

Right
Arrow points to the centre of the unit

outside  to centre

Wrong
Arrow points towards the connection

4 Replacing the filters step by step

1 Switch the unit off

Switch the unit off at the control panel and disconnect it from the mains. Wait until the fans have stopped.

2 Open the service hatch

Open the service hatch or cover to reach the filters.

3 Take out the old filters

The F7 is on the outdoor air (ODA) side, the M5 on the room air (ETA) side. Pull both out.

4 Find the arrow on the new filter

There is an arrow on the filter frame. Turn the filter so that the arrow points to the CENTRE OF THE UNIT.

5 Slide the new filters in

F7 on the ODA side, M5 on the ETA side. Push them all the way in, arrows still pointing to the centre.

6 Close the hatch and switch on

If the panel shows a filter warning, reset it. Done!

How often to replace?
Usually every 6 months, or when the control panel shows a filter warning.

Left-hand unit (L1)?
Then the filters are mirrored. The arrow still points to the centre of the unit.

Anything unclear?
Contact us and we will help you find the right filter: filt.ee

Old filter
Put it in a plastic bag and dispose of it with household waste.
